

Dataset: preambles_data.xlsx

- Unit of Observation: Each row in the dataset represents a constitutional preamble from a specific country and year.
- The data file contains two variables, Country (contains the country and year of the respective preamble) and Preamble (the preamble to the country's constitution). Each row in the data file represents a particular country and their most recent preamble.
- Variables:
 - Country
 - Description: This is the name of the country, as well as the year that the preamble was most recently revised. The country name is in English.
 - Type: Categorical (String)
 - Example Values:
 - "Austria 2013"
 - "Sri Lanka 2015"
 - Preamble
 - Description: This is the full text of the constitutional preamble for the specified county and year.
 - Type: Categorical (String)

Dataset: preambles_data.xlsm

- Unit of Observation: Each row in the dataset represents a constitutional preamble from a specific country and year.
- The data file contains two variables, Country (contains the country and year of the respective preamble) and Preamble (the preamble to the country's constitution, edited). Each row in the data file represents a particular country and their most recent preamble.
- Variables:
 - Country
 - Description: This is the name of the country, as well as the year that the preamble was most recently revised. The country name is in English.
 - Type: Categorical (String)
 - Example Values:
 - "Austria 2013"
 - "Sri Lanka 2015"
 - Preamble
 - Description: This is the text of the constitutional preambles to a respective country's constitution, with some minor edits, including spaces between punctuation marks.
 - Type: Categorical (String)
- The rest of the files in the DATA folder are replicas of this edited data file, saved as different formats or a more simple name.

Summary Statistics:

- Total Entries: 202
- Unique Countries: 202
- Time span of Preambles: 1808-2023
